“ My condolences to Allan’s family. I remember Allan as a youngster (many years ago), when I chummed around with his brother Gerald (Gerry) while at Kennedy Collegiate high school in Windsor. — Jim Chambers

“ Allan was one of the machine tool controls leading engineers in Windsor area in early 1980-ties when the industry was shifting from the relays into the PLC and the computer based systems. He was the trail blazer in this segment of the machine tool industry, and many of his original designs were later copied long, after he moved from Windsor to USA when our local machine tool industry started suffering from the NAFTA rules (no Canadian content required). We shared the same table at many annual Lamb luncheons. Rest in peace my Friend, You've made this world a "little bit" better. Thank You.

“ *Allan and I met several years ago when he worked at Tri-Way Machine in Windsor. Allan hired me to work in his department around 1983. He was a brilliant man but also humble and well respected. Rest in peace my friend.*
