“ Gershon was on my very first job in the ibew. A nursinghome in farmington michigan. At the time everything was new to me and kind of scary but gershon took the time to talk with me and made me feel more comfortable..he even sponsored me in the iaee. International association of electrical inspectors. At the time i had long hair. In his free time he created a sculpture out of wire that looked remarkable like me. Sadly a coworker from new york asked if he could have it for decor in his hotel room. Was actually a nice artistic piece. This was the only job i ever had the pleasure to work with him.
